

## Rose Pharm

Amazingly, pure peppermint oil scrambles the senses of insects, leaving them disoriented, unable to breed, feed or breathe. We have actually seen aphids land on treated rose buds, scramble

around for 15 minutes and fly away! Add to that, pure cottonseed oil as a miticide and potassium bicarbonate as an organic buffer. Please test first on ornamentals for best results, water well in the a.m. Then at dusk, spray a fine even mist on leaves top and bottom canes and (if you have blackspot) the base of the rose. Do not over spray.

Patent Pending

## Veggie Pharm

Tired of rabbits? To the formulations of Rose Pharm we have added a full ounce of pure food grade garlic extract as a repellent to insects, worms, and small mammals. The

fragrance will dissipate rapidly to humans yet linger for insects and critters. For best results, water well in the a.m. At dusk, spray a fine even mist on plants, vegetables and fruit. Do not over spray. Use freely until harvest. Please test first on ornamentals. We are told by a well known horticulturalist, Veggie Pharm kills adult Japanese Beetles on contact.

Patent Pending

## Flower Pharm

For years pure cinnamon oil has been known to have exceptional pesticidal properties. Combined with potassium bicarbonate as a buffer in Flower Pharm, we have seen hollyhock

rust, geranium rust and snapdragon rust eradicated while controlling garden pests and disease. Pure cottonseed oil is the miticide. Please test first on ornamentals. For best results, water well in the a.m., Then at dusk spray a fine even mist on plants, avoiding blooms. A well known Floridian grower of orchids has eradicated Orchid Mites in their greenhouses using Flower Pharm.

Patent Pending

## Indoor Pharm

We chose Organic Almond Oil for our interior product for its delicate and pleasant fragrance. Food grade oils smother scale, thrips, aphids, mealybugs, fungus-gnats,

white fly, spider mites, and so much more. Used twice monthly, Indoor Pharm will control mildews and fungus of all types. Please spray at dusk to avoid sunlight and lengthen drying time. Use freely on herbs and edibles up until harvest. You will be amazed! A large grower of houseplants has completely eradicated scale in their greenhouses by using Indoor Pharm regularly.

Patent Pending

## Garlic Pharm

Organic farmers have used garlic extract to repel insects from crops for many years. We have added potassium bicarbonate as a buffer. Used in between applications of our insecticidal soaps, Garlic Pharm will repel

aphids, thrips, white fly, cucumber beetles, spider mites, and aid in the control of rust, mildews, and fungi. Use freely on herbs, edibles and veggies up until harvest. The garlic fragrance will dissipate rapidly to humans but linger for insects and small critters. Please test first on ornamentals. For best results, water well in the a.m., Then at dusk spray a fine even mist. Not intended for indoor use.

Patent Pending

## Fish Pharm

This fermented salmon byproduct foliar fertilizer will delight you with results. No need for messy mixing here! Liberally spray this ready to use plant food on leaves. The good news? Fish

Pharm also contains potassium bicarbonate as a buffer. Used in combination with our other products, Fish Pharm will aid in the control of blackspot, powdery mildew and rust. Please test first on ornamentals. For best results, water well in the a.m., Then spray at dusk. Use freely on herbs, edibles and veggies up until harvest. Not intended for indoor use or in bear country.
